## Dear Henry,

In the United States, we spend more on healthcare than any other country in the world. Yet look at our life expectancy. As evidenced by this chart, with data collected from 1970-2021, our longevity has always been less than that of peer nations, but it's actually now—shockingly—on a downward slope. And we know from actuarial data, referenced by Pierre in numerous Op-Eds, that things have only gotten worse since 2021.

There couldn't be any clearer indication than this chart that **our healthcare system is entirely broken—a complete HOAX.** We make up 5% of the world's population, yet we consume 55% of the prescription medication on the market. All of this consumption, however, is not increasing our life span, but killing us sooner.

Data source: UN, World Population Prospects (2022); OECD Health Expenditure and Financing Database (2023 Note: Health expenditure data is expressed in international-\$' at 2015 prices. Our Modelful Poly are (financin-phealthcare) (CC BY

The information we've been given from medical journals, top-down healthcare systems, and the government agencies is compromised and ridden with pharmaceutical conflicts of interest. They don't care about us. They care about profits.

Now more than ever, we need a healthcare revolution.

Support Truth in Medicine

At the FLCCC, we've been calling out their lies, and speaking the TRUTH, since day one. Here are some examples of the Honest Medicine™ we've been sharing through our research:

- COVID was, and continues to be, treatable.
- Diabetes can be cured with diet, fasting, and repurposed drugs.
- There are strategies and novel therapies to treat long COVID and vaccine injury.
- The field of psychiatry has also been captured by Big Pharma; depression and anxiety can be treated with a host of nutraceuticals and nonpharmacological interventions.
- Cancer is a metabolic disease and adjunctive therapies like glucose management, fasting, repurposed drugs, and comprehensive lifestyle changes can greatly increase life expectancy.

It has been devastating to realize the depth of the deception, but once you see it, you can't look away. It must be exposed and remedied. Henry, it is our moral imperative to provide you with the information you need to be healthy and thrive. We will not stop until every lie is uncovered. It's long past time to shift that life expectancy curve upward again and instill **health** into our healthcare system once more.

Please, support our life-saving work today (your gift will be matched and go twice as far for FLCCC now through March 26th!). Join us in our mission to bring integrity, truth, and trust back to medicine. We need a healthcare revolution now, and we can't do it without you. On behalf of the entire team, I thank you for partnering with us to heal our country, and the world.

With much love, kindness, and gratitude,

Paul E. Marik, MD, FCCM, FCCP
