

vitamin D level	No. babies	Percentage
<10	7	13
10-24.9	30	56
25-49.9	17	31
≥50	0	0

**Table 3.** The repeat audit analysis still shows 69% of babies being Vitamin D deficient but fewer in the severe deficiency category (13% compared to the previous 44%)

**Figure 3.** The re-audit data shows 7 in 10 babies received the right medication, a marked improvement on the pre-intervention results
